☐ **About Zurich**

Zurich is Switzerland's largest city (~430,000) and global financial hub, yet its medieval Old Town (Altstadt) is one of Europe's best-preserved. Founded as the Roman customs post *Turicum* in 15 BC, it later joined the Swiss Confederacy in 1351. Today, it consistently ranks among the world's most livable cities. The city straddles the Limmat River where it meets Lake Zurich, with the iconic twin-towered Grossmünster dominating the skyline.

- ☐ **Did You Know?**
- The **Grossmünster** was founded by Charlemagne himself — legend says his horse stumbled on the graves of the city's patron saints, Felix and Regula, and he ordered the church built on that spot.
 - **Fraumünster's** Chagall windows (1970) are among the only religious works by the Russian-French modernist — he created them at age 83!
 - The **Lindenhof** hill was the site of a Roman fort — and later where Swiss women dressed as soldiers in 1292 to trick an invading Habsburg army into retreating.
 - Zurich's **Sprüngli** on Paradeplatz has been making luxury chocolates since 1836. Their Luxemburgerli macarons are legendary.

☐ **Where to Eat**

☐ **What Makes Each Place Special**

PLACE	WHY IT'S WORTH YOUR TIME
Fraumünster	Marc Chagall created the five stained-glass windows in 1970 at age 83 — they depict biblical scenes in his distinctive dreamlike blue, green, and red palette. The south transept window (blue) representing "Christ" is the most famous. Worth the CHF 5.
Grossmünster	According to legend, Charlemagne's horse stumbled on the graves of the city's patron saints and he ordered a church built. The twin towers are Zurich's most iconic silhouette. Climb for a 360° view of the city, lake, and Alps.
Lindenhof	This raised plateau was a Roman fort, then a medieval imperial palace, and even a 1292 battle site where Swiss women pranked retreating Habsburgs. Today it's the best free viewpoint.
Lake Zurich promenade	A car-free 3km lakeside walk. Alpine views on clear days, swans, and the perfect wind-down from a red-eye flight.

DAY 02

Friday, October 2, 2026
📍 Hotel Alpina · Frankenstrasse 6 (2 min from Chapel Bridge)

📌 **About Lucerne**

Lucerne (Luzern) sits on the shores of Lake Lucerne (Vierwaldstättersee) with the Swiss Alps as a dramatic backdrop. Founded in 750 AD, it became a key stop on the Gotthard trade route. The Chapel Bridge (Kapellbrücke), Europe's oldest surviving wooden bridge, dates to 1333 and snakes across the Reuss River with 17th-century painted panels. The Lion Monument (1821) commemorates Swiss Guards killed during the French Revolution — Mark Twain called it "the most mournful and moving piece of stone in the world."

- 📌 **Did You Know?**
- The **Chapel Bridge** was nearly lost to a fire in 1993 — 78 of its 158 painted panels were destroyed. The surviving 80 originals are on display.
 - **Mt. Pilatus** is named after a legend that Pontius Pilate's body was thrown into a lake on the mountain, causing storms.
 - The **Lion Monument** was carved into a sandstone quarry by Danish sculptor Bertel Thorvaldsen. The dying lion is 10m long.
 - The **Musegg Wall** (1408) is one of the best-preserved medieval city walls in Switzerland. Four of nine towers are climbable.

DAY 04

Sunday, October 4, 2026
☐ Milan TBD (near Duomo or Milano Centrale)

☐ **About Milan**

Milan (Milano) is Italy's financial and fashion capital, but its roots go back to 600 BC when the Insubri Celts founded Mediolanum. It became the capital of the Western Roman Empire in 286 AD, then flourished under the Sforza dukes during the Renaissance. Leonardo da Vinci spent 17 years here (1482-1499), creating *The Last Supper* and designing canals. The Duomo (started 1386, finished 1965!) is the largest church in Italy and 5th largest in the world. Every detail of Milan whispers power, art, and ambition.

- ☐ **Did You Know?**
- **The Last Supper** took Leonardo **3 years** to paint (1495-1498). He experimented with an oil-tempera mix on dry plaster instead of traditional fresco — which is why it's been fading and requiring restoration for centuries.
 - The **Duomo** has 3,400 statues, 135 spires, and a golden Madonna (Madonnina) at 108.5m. It took **579 years** to complete.
 - The **Galleria Vittorio Emanuele II** (1877) is the oldest active shopping gallery in Italy. Locals believe spinning your heel on the mosaic bull's testicles brings good luck.
 - During WWII, Milan was heavily bombed — but the **Last Supper wall was sandbagged and protected** , surviving the destruction of the entire refectory around it.

☐ **Where to Eat**

Place	Type	Cost
Luini (Via S. Antonio)	☐ Famous fried panzerotti	~€5
Miscusi (various)	☐ Modern pasta chain	~€12-18
Brera area	☐ Classic trattorias	~€20-35

- Medium risk.** Pickpocket hotspots: Duomo, Galleria, metro M1/M3, Centrale station
- ☐ **"Friendship bracelet" scam** — men tie bracelets on you in Duomo square, then demand payment. Shake them off.

Each village has its own personality: Monterosso (beach resort), Vernazza (picturesque harbor), Corniglia (clifftop), Manarola (sunset views), Riomaggiore (steep and colorful). DAY 07

Wednesday, October 7, 2026
☐ Florence — same hotel (night 2 of 2)

☐ About Florence

Florence (Firenze) is the cradle of the Renaissance. In the 15th century, the Medici family transformed this Tuscan city of 60,000 into the most culturally explosive place on Earth. In a single generation: Brunelleschi built the Dome (the largest masonry dome ever constructed), Donatello sculpted David, Masaccio revolutionized painting, and a young Leonardo da Vinci apprenticed in Verrocchio's workshop. Then Michelangelo, Raphael, and Botticelli followed. The **Uffizi Gallery** has the world's finest collection of Renaissance art. The **Accademia** houses Michelangelo's David (1504) — the most famous sculpture in history.

☐ Did You Know?

- Brunelleschi's Dome was built **without scaffolding** — he invented a revolutionary herringbone brick pattern that supports itself during construction.
- **David** was carved from a single block of Carrara marble that two earlier sculptors had **rejected** as flawed. Michelangelo was 26 when he started.
- The **Uffizi** (literally "offices") was originally built as Medici government offices in 1581 before becoming a museum.
- **Botticelli's Birth of Venus** in the Uffizi was **lost for 400 years** — considered pagan and inappropriate after the Renaissance until the 19th century.

☐ Where to Eat

Place	Type	Cost
All'Antico Vinaio	☐ Famous €8 sandwich	~€8
Mercato Centrale	☐ Upper floor food hall	~€10-18

DAY 08

Thursday, October 8, 2026
☐ Rome TBD (4 nights, same hotel)

☐ **About Siena**

Siena is a perfectly preserved medieval city — a rival to Florence in artistry, politics, and pride. In the 14th century, Siena was Florence's great enemy. The shell-shaped **Piazza del Campo** is one of Europe's greatest squares. Twice a year, it hosts the **Palio**, a bareback horse race that lasts 90 seconds (but the rivalry lasts all year). The Siena **Duomo** has an extraordinary mosaic floor that took 200 years to complete (covered for most of the year — you might catch it if October exposure allows). The Piccolomini Library has frescoes by Pinturicchio that rival the Sistine Chapel.

- ✂ **Key Tips**
- Bus 131R from Florence Autostazione (behind SMN). Arrive **10 min early** — buses fill up.
 - Backup: regional train via Empoli

DAY 09

Friday, October 9, 2026
□ Rome — same hotel

□ About Vatican City

Vatican City is the world's smallest independent state (44 hectares, ~800 citizens) and the spiritual center of 1.3 billion Catholics. **St. Peter's Basilica** (built 1506-1626) is the largest church in the world — conceived by Pope Julius II, designed by Bramante, Raphael, and Michelangelo (who designed the dome at age 72). The **Vatican Museums** contain one of the world's greatest art collections, amassed by popes over 500 years. The **Sistine Chapel** ceiling (1508-1512) is Michelangelo's masterpiece — 500m² of fresco depicting nine scenes from Genesis, including the iconic Creation of Adam.

□ Did You Know?

- **St. Peter's** is built on the site where St. Peter (the first pope) was crucified and buried — his tomb is directly under the main altar.
- The **Dome climb** is 551 steps (elevator takes you 231 steps up, then 320 steps). The view from the top is worth every step.
- The **Sistine Chapel** ceiling was painted by Michelangelo **standing up** (not lying down as commonly believed). It took 4 years, damaging his eyesight permanently.
- The **Vatican Museums** have 7km of corridors. If you spent 30 seconds on each piece, it would take **12 years** to see everything.

□ Where to Eat (Rome)

□ About Ancient Rome

For over 1,000 years, Rome was the center of the Western world. The **Colosseum** (80 AD) held 50,000 spectators for gladiator battles and mock naval fights. The **Roman Forum** was the political, religious, and commercial heart of the Republic — where Cicero spoke, Caesar was assassinated (in the Curia of Pompey nearby), and emperors built triumphal arches. **Palatine Hill** is where Rome was founded (753 BC) — emperors built their palaces here (the word "palace" comes from Palatine). The **Borghese Gallery** houses Bernini's most sensual sculptures and Caravaggio's most dramatic paintings.

□ Did You Know?

- The **Colosseum** could be flooded for mock naval battles — 50,000 spectators watched ships fight. It had 80 entrances and could empty in 10 minutes.
- **Bernini carved Apollo and Daphne** (Borghese) at age 22 — the marble transforms into leaves so realistically you can see through it.
- The **Roman Forum** was buried under 10m of earth for 1,000 years — farmers called it "Campo Vaccino" (Cow Field).
- **Trevi Fountain** (1762) uses 80,000m³ of water daily — all from the Acqua Vergine aqueduct, built in 19 BC. Throwing a coin over your LEFT shoulder guarantees your return to Rome.

✂ Ancient Rome Scams
